# SPROCS, CONSTRAINTS

```csharp
[Fact]
public void Placing_An_Order_Adds_The_Order_To_The_Customers_Account()
{
    // Arrange
    var customer = new Customer(
        1, // Id
        "Jo", "Bloggs", // Name
        "10 City Road", "Staines",
        "Middlesex", "AB1 2CD" // Address
    );
    var order = new Order(1, customer);

    // Act, Assert: not interesting for this example
}
```

```csharp
[Fact]
public void Placing_An_Order_Adds_The_Order_To_The_Customers_Account()
{
    // Arrange
    var customer = ACustomer()
                    .WithGivenName("Jo")
                    .WithFamilyName("Bloggs")
                    .Build();

    var order = new Order(1, customer);

    // Act, Assert: not interesting for this example
}
```
